**Subject:** Comments for Hearing on renewable energy (PA295)

Hello,

As Co-Chairman for policy for The Detroit Green Skills Alliance I submit these comments for your review.

Michigan stands poised, in the beginning of the 21 Century, to become a leader in green technology. As we have seen in Detroit our Green Skills Alliance has created a forum for new ideas, an exchange for best practices, and, most importantly, it has emerged as a job creator.

Communities are seeking leadership for innovative tax policy in the implementation of alternative energy. We need legislation to support tax incentive ideas for home owners and businesses; we need educational support for our students to be exposed and trained in the emerging green jobs; and we require a commitment from the State of Michigan to create a foundation upon which we can succeed.

Best Regards,

**George Emanoil**
